Subject: Integration of BERGQUIST® systems into Henkel SAP Systems

Dear Valued Customer,

As you are aware, Henkel acquired The Bergquist Company in late 2014. Since then, Henkel has been integrating the Bergquist organization and analyzing the parallel IT systems in an effort to create minimal disruption once the IT systems are brought together. Beginning December 27, 2018, Henkel began integrating all Bergquist products and transactional processes into the standard ERP systems of Henkel. We anticipate that this standardization on a single IT infrastructure will enable streamlined operations and result in better service to Henkel's global customers.

We ask that you review the below, inform all affected parties within your organization and make the required modifications to your operations.

Product Nomenclature

As of January 1, 2019, new product naming convention and part (IDH) numbers will go into effect. Every BERGQUIST brand product will have a unique IDH number, IDH description, "known as" description and a sub-descriptor that defines product specifics such as length, width and thickness.

All these elements are also aligned to product literature and Technical Datasheets, so product names will be consistent on Henkel supporting documents going forward. For ease of transition, the former product name (in addition to new product details) will be maintained on documentation until further notice.

Overview for the BERGQUIST brand products nomenclature changes from Henkel that are impacted by these changes are in the attached tables.

Your contact person at Henkel remains the same and will be at your disposal to provide any additional information you may require. We are highly committed to your business and look forward to serving your needs well into the future.

Yours sincerely,

Henkel Corporation

George Thomas

A handwritten signature in black ink, appearing to read "George Thomas".
